GRAFFE

design Franca Lucarelli - Bruna Rapisarda

___ L'ispirazione progettuale di Graffe sono gli anni del Pop. Il tema è la dilatazione della forma di oggetti d'uso quotidiano e il loro cambio di funzione in un gioco di immediata riconoscibilità e piacevolezza. Un radiatore elegante e raffinato, puro nella forma e nelle proporzioni, con un design innovativo e inconfondibile realizzato da un tubo in acciaio circolare che si snoda sinuosamente, dando vita a uno scaldasalviette unico e speciale, che supera la funzionalità per diventare elemento d'arredo.

___ Graffe's design inspiration is the Pop years. The theme is the dilation of the form of everyday objects and their change of function in a game of immediate recognition and pleasure. An elegant and refined radiator, pure in shape and proportions, with an innovative and unmistakable design made from a circular steel tube that runs sinuously, giving life to a unique and special towel warmer, which exceeds functionality to become a piece of furniture.

!

l'istallazione delle Graffe 170 verticali è vietata in impianti di riscaldamento centralizzati a colonna (tipo condominio) ove non sia possibile la taratura e il bilanciamento degli altri terminali presenti sulla stessa colonna montante

The installation of vertical Graffe 170 is prohibited in column-type central heating systems (e.g. apartment block) where the calibration and balancing of the other terminals fitted in the same standpipe cannot be carried out

L'installation des Graffe 170 verticaux est interdite dans les installations de chauffage centralisées a colonne (type copropriété) où il ne serait pas possible d'exécuter l'équilibrage et l'équilibrage des autres embouts prévus sur la même colonne montante

La instalación de las Graffe 170 verticales queda prohibida en las instalaciones centralizadas de calefacción de columna (tipo bloque de apartamentos) en las que no pueden ejecutarse la calibración y el equilibrado de los otros terminales presentes en el mismo tubo montante

Die Installation der Krampen 170 in der senkrechten Ausführung ist bei zentralisierten Säulenheizanlagen (wie in Miteigentumsgebäuden) nicht gestattet, wo die Eichung und der Ausgleich der anderen, an der Säule selbst angebrachten Anschlusseinheiten, nicht möglich ist
